

ECCO SHOE CARE

The ECCO Shoe Care range is a complete system tailor-made for ECCO products. The formulations are developed using similar technology as skincare products and designed to complement the features of our outdoor range as well as technical systems like GORE-TEX®. This means that no matter what you put yourself through when exercising, you'll always be able to take care of your shoes.

CLEAN. CARE. PROTECT.

STEP 1: **CLEAN**

A post-exercise shower for your shoes. Our water-based CLEAN products effectively remove any built up dirt and instantly revive textile and leather products, whilst enhancing the freshness of the shoe.

STEP 2: **CARE**

Our CARE products work like lotion to soften and moisturise the leather on your shoes. They are formulated to shine, ensure suppleness and prevent leathers from drying out.

STEP 3: **PROTECT**

Before you head out to exercise, you protect your skin with layers, so why not do the same with your shoes. Our PROTECT products work as a protective coating to minimise the effects of rain and stains.

**YOU KEEP YOUR BODY IN SHAPE.
KEEP YOUR SHOES THAT WAY AS WELL.**
